Company Profile

Since 2017 we have been working in the RMG industry catering to our many valued customers with **efficiency, honesty, and reliability.**

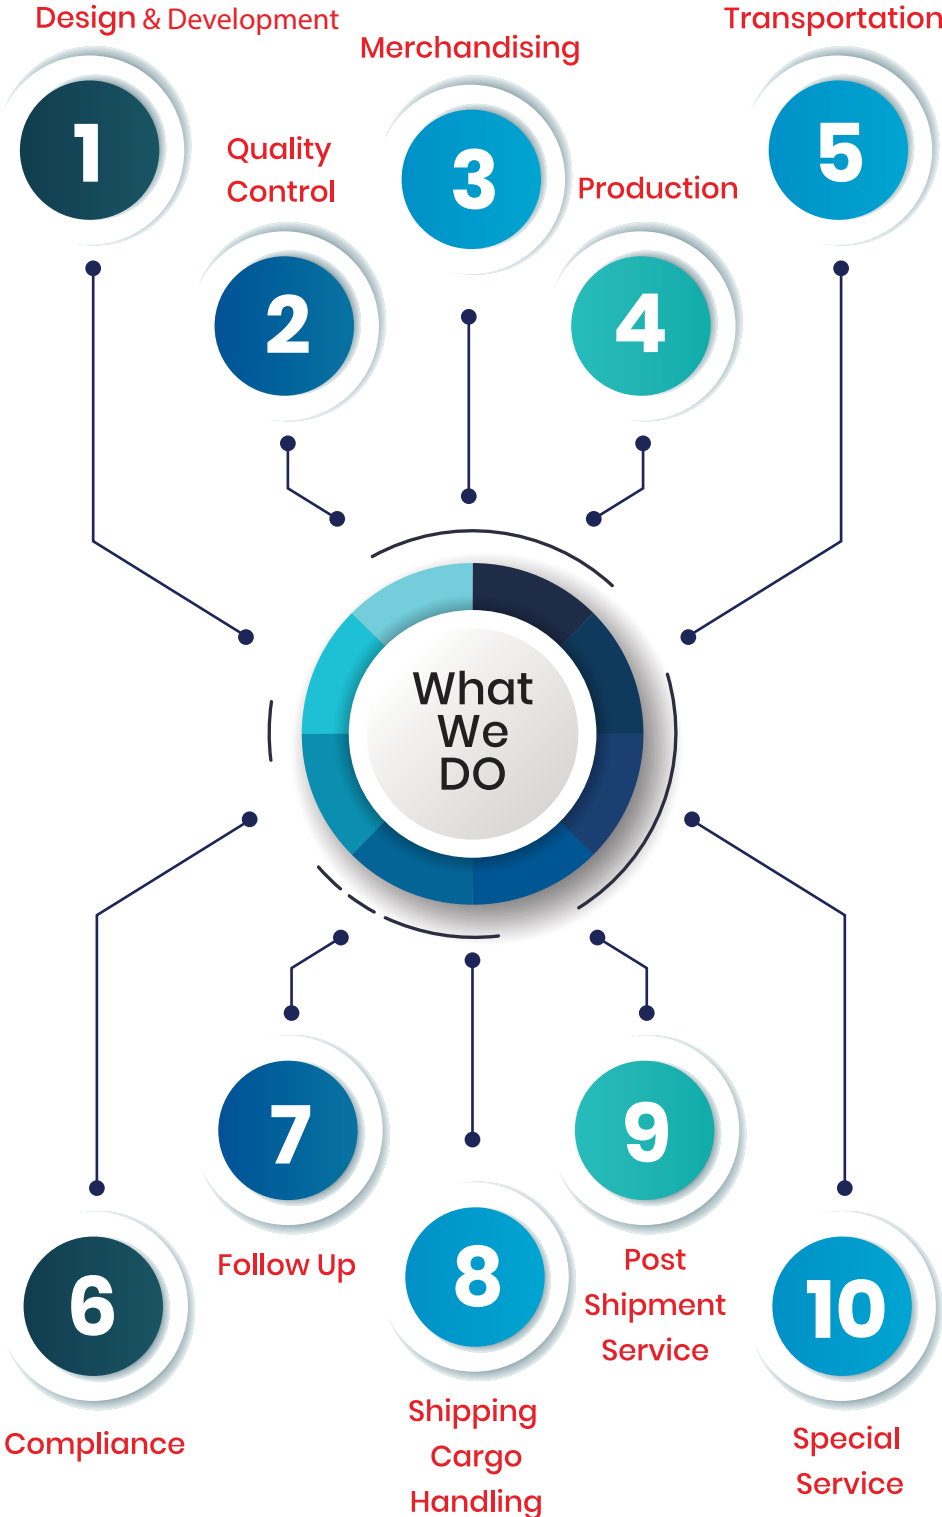

About Our Company

Tex One BD is an APPAREL BUYING HOUSE & Manufactures specialized in providing customized service to buyers with Sourcing, Merchandising, Quality Control, Product Development, and assuring Compliance Issues for products manufactured for USA and EEC market. We are experiencing tremendous growth in terms of expanding the operational capacity and building up a strong marketing network all over the USA, EEC, and the Far East.

Bangladesh is second only to China, the world's second-largest apparel exporter of western brands. Bangladesh has become the ideal choice for most buyers around the world to carry out their production operations.

At **Tex One BD**, we bridge the world with Bangladesh. Since 2017 we have been working in the RMG industry catering to our many valued customers with efficiency, honesty, and reliability.

We give the **Best Services**

Design & Development

We improvise our designs in conceptualization of the current trends and a visualization of the future.

Merchandising

We have 15 stuffs in merchandising team, divided in to 3 divisions in Fashions Exports & Imports BD to attain our valued customers and 5 merchandisers in all factories to give production/development feedback.

Transportation

We have our own services to support a smooth transportation of raw material and shipping goods to ports and we're well experienced in shipping mode such as sea and air.

Production

With more than 50 production staff, our monthly export is over 3,50,000pcs weaters /Knit /Woven /Denim /Heavy jackets. All the factories are around Dhaka and are always in communication with the Fashions Exports & Imports BD in Dhaka.

We give the **Best Services**

Compliance

We have internal compliance teams stationed in each of our factories, keeping the compliance standards mentioned above regularly. These teams report directly to our central Compliance Department stationed in TexOne BD office.

Follow Up

Tex One BD follows up each order in precise details from fabric to garment and to shipment. At each stage, progress is intimated to the buyer and merchandising department keeps the buyer's representative informed of the actual status of the orders throughout.

Post Shipment Service

To avoid demurrage at the destination, DAZ collects copies of shipping documents such as B/L, AWB, Invoice, Packing list, original G.S.P., Certificate of Origin, Export Certificate, etc. from all suppliers immediately after shipment and forward it to respective buyers.

We give the **Best Services**

Shipping Cargo Handling

Shipping documents are checked to verify their conformity to the buyers instructions and sent well in advance to the buyer. As a policy, Tex One BD insists that all of its cargo must be handled only by a reputed Forwarder, so that, Tex One BD gets correct information well in time about an exact vessel sailing details, ETD / ETA of vessels and may also try for priority in booking and loading wherever possible. In suitable circumstances, Tex One BD may arrange a grouping of cargo arriving from different suppliers. This system enables the buyer to import several consignments as one lot and reduces the import cost on freight, clearing & forwarding, and cargo handling.

Quality Control

Our focused and well-trained QA teams are working in every key checkpoint of the manufacturing stages to attain the customer's required quality standards. Starting from sample approval to the final production stages, our QCs are always monitoring and supervising the factory people. To achieve the stiff target of attaining the high standards, we allocate individual QA teams for individual clients, working around the clock in every factory we produce at.

These teams at the factories are centrally monitored and regulated by the QA department stationed at TexOne BD on a daily basis. Consequently, our efficient quality control system has enabled us to meet the AQL standards set by the clients.

In order to better ourselves, we have developed a chain of procedures to ensure our required standards are met to maximize production and minimize wastage. And this also ensures on-time shipment according to plan.

- Understanding the customers' quality requirements.
- Organizing & training quality control department.
- Ensuring the proper flow of quality requirements to the QC department.
- Ensuring the proper flow of quality requirements to the Production Department.
- Establishing quality plans, parameters, inspection systems, frequency, sampling techniques, etc.
- Inspection, testing, measurements as per plan.
- Record deviations
- Feedback to Production Department.
- Plan for further improvement.

We push ourselves to the limit to make sure that the chain of procedures mentioned above is followed every time for every order.
